PROFESSIONAL SUMMARY

Full Stack Web Developer with over 5 years of experience designing, developing, and maintaining modern web applications using Angular, React, and .NET or nodejs technologies. Experienced in building scalable, responsive, and high-performance systems across both front-end and back-end architectures, with a strong focus on clean code, maintainability, and user experience.
Skilled in developing enterprise-level management systems, e-commerce platforms, and custom business solutions, from UI implementation to API integration and database interaction. Adept at quickly learning new technologies, collaborating within Agile teams, and delivering reliable solutions under tight deadlines.
Experienced in freelance and client-based projects ranging from small business websites to large-scale web platforms. Currently seeking opportunities to contribute to professional software teams and long-term projects where technical expertise and continuous growth are highly valued.

WORK EXPERIENCE

Freelancer

2020 - 2026

Full-stack web developer

I am a remote Full Stack Developer Freelancer specializing in building and maintaining modern web applications for individuals and businesses. My work involves analyzing project requirements, designing user interfaces, developing backend systems, managing databases, and optimizing overall application performance.
I have experience working with various technologies, including:
-Frontend: Angular, React, Next.js, Tailwind CSS
-Backend: .NET, Node.js, Express.js
-Databases: MySQL, SQL Server, MongoDB
-Other tools: Git, Docker, REST APIs, Firebase

My responsibilities also include:
-Developing new features and functionalities
-Fixing bugs and improving system performance
-Creating responsive and user-friendly interfaces
-Integrating third-party APIs and services
-Building authentication and authorization systems
-Deploying applications to servers or cloud platforms

Working as a freelance developer allows me to manage projects flexibly, collaborate with different clients, and continuously improve my technical and problem-solving skills. I always focus on delivering scalable, efficient, and high-quality solutions that provide the best experience for users.

PROJECTS

AI Travel Assistant & Smart Tour Recommendation Platform

2025 - now

Full stack developer

AI-powered travel assistant platform focused on tourism destinations around Quy Nhơn and Gia Lai. The system provides intelligent travel recommendations, personalized itineraries, and tour booking suggestions based on user conversations and preferences.
Responsibilities

- Developed an AI-powered chatbot that collects user preferences through natural conversations.

- Built a smart recommendation system suggesting:
    - Tourist attractions
    - Restaurants and local food
    - Hotels and accommodations
    - Travel timelines and schedules
    - Personalized travel experiences
- Implemented AI-based itinerary generation based on:
    - Budget
    - Travel duration
    - Group size
    - Preferred activities
    - Nearby destinations
- Integrated tour recommendation features connected to company services and booking workflows.
- Developed admin management features for:
    - Tour management
    - Destination management
    - AI prompt/configuration management
    - User conversation analytics
    - Booking management

Technologies: Next.js, NestJS, TailwindCSS, MySQL(database), AI/Integration (deepseek, openAI), Responsive Design
Team Size: 3 Developers

Mama's Pizza – Food Ordering Landing Page & Admin Management System

2025 - 2026
